

TerraDeck™

the naturally green deck®

It's more than a deck. It's a platform for living.

NATURES COMPOSITES™
organic building products

Made in the USA.
Helping American
Farmers and the
Environment.

It's what every builder wants
and every homeowner dreams of...

Eco-friendly composite fence systems
make it easy to build green for life!

Natures Composites' products are engineered to be the highest quality composite wood substitute products on the market, using a process that respects protecting the environment for future generations to come. Natures Composites uses wheat straw as a superior form of cellulose rather than wood for its natural fiber. Agri-fiber is annually produced whereas trees require decades to harvest and harvesting forests are known to adversely impact ecosystems. Recycled plastics are incorporated into our product for strength and durability keeping this valuable resource from clogging up our ecosystems in landfills.

ULTIMATE CO-EX DECK

- Core is wheat straw cellulose combined with recycled HDPE (milk jugs)
- Capped with a propriety blend of HDPE/ hybrid of advanced engineered polymers
- Matte Finish with Hard Surface
